

# FORTRESS™

## Foaming Antibacterial Hand Soap

### FORTRESS™ Foaming Antibacterial Hand Soap feels silky on hands

Correct handwashing practices are enhanced by the use of FORTRESS Foaming Antibacterial Hand Soap.

#### Higher efficacy level for foodservice demands.

- Proven effective against a broad range of bacteria, including *E. coli*, *Salmonella*, *Staphylococcus* and *Listeria*.
- Antibacterial action is equivalent to 50 ppm available chlorine.
- Gentle and pH-balanced formula is ideal for frequent handwashing.
- Foam lathers faster, covers hands better and rinses more easily.
- Pleasantly scented.

# FORTRESS™

## Foaming Antibacterial Hand Soap

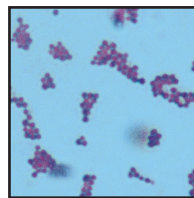

### Background:

Frequent handwashing reduces the threat of foodborne illnesses caused by common foodborne pathogens. The unique foaming action of FORTRESS™ Foaming Antibacterial Hand Soap, along with its gentleness on hands, encourages frequent handwashing.

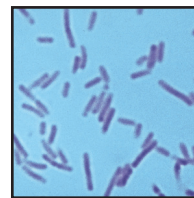

#### Foodborne Pathogens

*E. coli*

*Staphylococcus*

*Listeria*

### Use Directions:

1. Rinse hands under clean, running **warm** water.
2. Apply soap.
3. Rub hands together vigorously for 20 seconds, paying attention to areas between fingers and around fingernails. Scrub wrists and the exposed areas on arms.
4. Rinse thoroughly under clean, running **warm** water.
5. Dry hands with a clean, single-use towel or a heated-air hand dryer.
